This curriculum is created to be educational, challenging, and exciting for the students. The program curriculum is developed with a dual approach in mind. Training will be in-class study lectures relating to various subjects meeting State Massage Board requirements and certifications. During the study lectures, the students will be using Massage Therapy Learning Management System which will allow them to learn, study, review, and test the body of knowledge of massage therapy.

This program includes the following:

39 Web-Based Interactive Massage Therapy Courses compliant with the National Certification Board Therapeutic Massage and Bodywork (NCBTMB), along with course completion certificates.

2,200 Web-Based Test Questions by

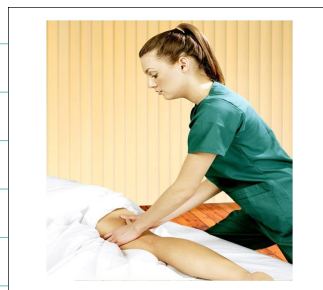

category. This e-testing is in support of passing the NCBTMB, Mblex, and NCETM Massage Therapy Certification (Simulated Practice Test and Timed Final tests)

29 Animated Muscle Tutorials with video clips, audio, and study quizzes for each section. Students will have the ability to print out questions and answers results.

7 Massage Therapy Skeletal Audio Tutorials.

153 Muscle Flash Cards.

145+ Muscle Colour Book

Train to be a Massage Therapist!

Student Benefits	6

Bodywork Styles

A variety of massage and bodywork styles will be covered in the Massage Therapy Program. Students are exposed to a wide variety of modalities and styles of techniques to meet the needs of a growing population who are in need of massage. This section also teaches body mechanics, professional draping techniques, seated massage, side lying massage, pregnancy massage, sport massage, and massage adaptations for special populations.

The instructors will act as coaches, evaluate the student, and give feedback based upon technique application and body mechanics. Additionally students will prepare and give a short presentation to the class on a massage modality of their liking. Learning these varieties of modalities will enable the graduates to integrate these techniques into their treatment sessions that are most appropriate at each occasion.

Success as Massage Therapist

Success as a massage therapist depends on two factors: education/skills training and high-quality tools and their proper use. Success all depends on the Massage room/massage studio, where massage is actually performed. Another factor is the massage office/paper office, where paperwork and scheduling are done. This course will walk you through the essentials of the environment and how important that is to all the business grow and flourish.

Who Should Attend the Massage Program?

Qualified students must be at least 18 years of age or have received a high school diploma or Graduate Equivalency Diploma (G.E.D.).

Essentially anyone who is interested in wellness education can apply for the Massage Therapy Program. When completing the massage

therapy program students must pass the Massage State and/or National Certification Examination; must have completed a 2-hour course on the prevention of medical errors; and submit an application and fee for licensure as a massage therapist.

HCC Massage Therapy Objectives

It is the goal of Hillsborough Community College to provide a comprehensive Massage Therapy curriculum designed to blend the following elements:

Develop knowledge and understanding of the scientific studies of Human Anatomy and Physiology, Kinesiology, Massage History and Development, Pathology, Contraindications, Areas of Caution, Benefits and Effects of Massage, Ethics, Laws, and Regulations, Client Assessments and Treatment

Planning, and more, all delivered online.

Acquire skills in theory and practice of different disciplines of massage therapy, and allied modalities.

Achieve an understanding of the benefit and limitations of massage therapy. When necessary, refer patients/client to other practitioners.

Teach the business skills necessary to either work as an employee or successfully operate a massage therapy practice.

Foster respect and concern for the client by understanding the professional boundaries and ethics; and develop skills in interpersonal communication and draping.

Encourage students to be aware of client/patient care as well as self-care which include proper movement during massage. Promote safety, longevity and prevent injury to ultimately serve the public with the highest quality of health care

Student Clinic Saturdays at the Collaboration Studio

Student Clinic

Applying all skills and knowledge while working with members of the public in a supervised setting.

Learn the guidelines for Professional Practice

Gain knowledge, confidence, and practical skills necessary to practice massage therapy in the workplace, as well as self-employment.

Student Benefits

Many benefits are listed below that will assist you in the success of learning the massage therapy field while making studying that much easier and interactive.

A Complete Learning, study, Review, and Certification Exam Prep Package

Students have access to 39 Online Interactive Massage Therapy Training Courses, as well as, 150+ Muscle Groups including Muscular System Study Guide, Interactive, Tutorials, Animations, Videos, Voice Narrative, Muscle Study Guide, Skeletal Systems, Physiology, Anatomy and Physiology. Each course has multiple Learning Hand-outs, Support Notes, and Exercise Sheets.

Distant Massage Therapy Program

Students also have access to 19 subjects and 13 simulated finals. This will assist you in reviewing your skills and knowledge already acquired through your massage training institute and finally put your skills to the test.

You will have several attempts to answer the questions and then receive instant feedback from your choices. You can take as much time as you need to complete each section.

This curriculum and Certification Exam Prep Modules are in a real Learning Manage-

ment System (LMS).
